- Worked as MS Dynamics CRM Senior Developer with **Starlite Infotech Limited, Hyderabad from 4th** Feb 2019 to Nov 2025.

Projects Involved

Project # 1 : **PEI Group - Subscriber Intelligence & CRM Platform**
Team size : **8**
Environment : **Microsoft Dynamics 365, Azure Functions, Power Automate, C#.NET, Azure DevOps, CI/CD Pipelines.**
Description :

PEI Group is a subscriber-focused business intelligence company providing industry-leading journalism, data, and market insights to investment professionals across global private markets including private equity, real estate, infrastructure, and private debt. The CRM platform underpins PEI's subscriber management, data analytics, and digital publishing operations, serving a global client base of asset managers, institutional investors, and financial advisors.

Responsibilities:

- Designed and developed Dynamics 365 CRM customisations, plugins (C#.NET), and Azure Functions to automate subscriber management and data workflows across PEI's portfolio of specialist brands.
- Built and maintained CI/CD pipelines using Azure DevOps and Power Platform Build Tools for automated deployment of Dynamics 365 customisations from development to production environments.
- Integrated Power Automate flows with Dynamics 365 to streamline business processes including subscriber onboarding, renewal workflows, and cross-brand data synchronisation.
- Collaborated with product, design, and data engineering teams in an Agile (Scrum) environment to deliver user-centric CRM enhancements aligned with PEI's digital publishing and analytics platform.
- Provided technical leadership and mentorship to junior developers, conducted unit testing, applied SOLID principles and software design patterns to ensure maintainable, scalable solutions.
- Managed sprint planning, stakeholder communications, and sprint deadlines as part of an enterprise-scale Agile delivery team supporting PEI's global operations across EMEA, USA, and Asia.
